Habitat for Humanity of Metro Denver goes solar with the Conergy Community Challenge

During the week of the Democratic National Convention, a Habitat for Humanity of Metro Denver home will go green with a 2kW photovoltaic installation as part of the Conergy Community Challenge. The project is made possible through a generous contribution of equipment and installation labor provided by Conergy, a global renewable energy products distributor and system integrator with its American headquarters located in Denver. The installation will be a training and team-building event for local Conergy employees. Under the agreement, Conergy is providing all equipment below cost and the installation labor for free.

“This project connects our employees—many of whom don’t often get the opportunity to work directly with our products—to our company’s core values and mission: to provide clean power solutions for every energy consumer worldwide” said Kim McLawhorn, Managing Director, Conergy Americas. “It also gives us the opportunity to work with an amazing organization such as Habitat for Humanity and provide affordable clean energy for a deserving family.”

WHO: Habitat for Humanity of Metro Denver and Conergy

WHAT: 2kW Solar Installation

WHEN: 9:00am – 4:00pm, August 25-27, 2008

WHERE: 1851 Altura Blvd, Aurora, CO

The Conergy Community Challenge provides a way to give Conergy employees direct, hands-on experience with solar power, while giving back to the community by offering power systems to qualifying non-profit organizations. In July, Conergy New Mexico employees installed a solar energy system for Turquoise Trail Charter School near Santa Fe. Future projects include a Sacramento, CA fire station.

About Conergy

Conergy AG is one of the world’s largest companies 100% dedicated to renewable energy with an array of premium manufactured products and over 70,000 solar systems installed worldwide. Conergy produces, installs and plans solar energy systems for its customers in more than 20 countries on 5 continents. In the US, Conergy is a manufacturer and distributor of premium quality solar electric, solar thermal, solar water pumping, and wind power solutions to a national network of authorized dealers. For more information, visit www.conergy.us

About Habitat for Humanity of Metro Denver:

Habitat for Humanity is a faith and community-based homeownership program. Carefully selected homeowner candidates, along with volunteers, build quality, affordable homes throughout the metro area. Homes are not given away. Hard-working families purchase Habitat homes with zero-interest loans and make mortgage payments based on 25 percent of the family's income. Habitat for Humanity of Metro Denver has built 350 homes in the metro area. For more information about Habitat for Humanity, please visit www.habitatmetrodenver.org.

Habitat for Humanity of Metro Denver goes solar with the Conergy Community Challenge

Denver, CO -- August 20, 2008 – Conergy and Habitat for Humanity are joining forces to bring affordable and sustainable energy to a family in Aurora.

Conergy, a global renewable energy products distributor and system integrator with its North American headquarters in Denver will help Habitat install a 2kW photovoltaic electric system on a new home at 1851 Altura Boulevard in Aurora, Colorado. As part of a companywide community participation challenge, called the Conergy Community Challenge, Conergy will support Habitat by supplying all equipment needed for the project below cost and all the installation labor for free. The installation will be completed during the week of the Democratic National Convention.

Both organizations look forward to working together. Habitat is one of the most energy-efficient homebuilders in Colorado, including for-profit homebuilders. For more than a decade, Habitat has built homes that are affordable to purchase and affordable to maintain - helping homeowners save hundreds of dollars in utility costs each year.

"Habitat for Humanity of Metro Denver is so excited to work with Conergy as our first solar sponsor on one of our 11 homes at east 18th Avenue and Altura Street. All of our homes are built to a very high energy standard and the addition of solar electric helps ensure stability in our families' utility bills. Conergy's outstanding employees have provided the means and manpower to launch a successful pilot solar program. Ultimately, this effort is making a huge impact on a family's life by providing them with sustainable and renewable energy for years to come" said Chuck Watkins, Habitat Metro Denver's Director of Operations.

"The Conergy Community Challenge provides a way to give Conergy employees direct, hands-on experience with solar power, connects our employees to the community enabling them to see first hand how our products can help the community in which we live and work. It also allows us the opportunity to live our core values and mission -- to provide clean power solutions for every energy consumer worldwide. We are pleased with the opportunity to work with an amazing organization such as Habitat for Humanity and provide affordable clean energy for a deserving family," commented Kim McLawhorn, Conergy Americas Managing Director.
